# Mastering SIMULINK®

JAMES B. DABNEY • THOMAS L. HARMAN

1. Introduction
    - 1.1 What Is Simulink?
    - 1.2 Simulink Examples
    - 1.3 Simulink Employment Strategies
    - 1.4 Selection Considerations
    - 1.5 Outline of Text References
  2. Block Diagrams
    - 2.1 Introduction
    - 2.2 Continuous Systems
    - 2.3 State-Space Block
    - 2.4 Discrete Systems
    - 2.5 Discrete State-Space Block
    - 2.6 Nonlinear Blocks
    - 2.7 Hybrid Block Diagrams
    - 2.8 Summary References
  3. Quick Start
    - 3.1 Introduction
    - 3.2 Building a Simple Model
    - 3.3 A More Complicated Model
    - 3.4 The Simulink Help System
    - 3.5 Summary References
  4. Model Building
    - 4.1 Introduction
    - 4.2 Opening a Model
    - 4.3 Model Window
    - 4.4 Manipulating Blocks
    - 4.5 Signal Lines
    - 4.6 Annotations
    - 4.7 Adding Sources
    - 4.8 Adding Sinks
    - 4.9 Data Types
    - 4.10 Configuring the Simulation
    - 4.11 Running a Simulation
    - 4.12 Printing a Model
    - 4.13 Model Building Summary
    - 4.14 Summary References
  5. Continuous Systems
    - 5.1 Introduction
    - 5.2 Scalar Linear Systems
    - 5.3 Vector Linear Systems
    - 5.4 Modeling Nonlinear Systems
    - 5.5 Summary References
  6. Discrete-Time Systems
    - 6.1 Introduction
    - 6.2 Logical Blocks
    - 6.3 Vector Discrete-Time Systems
    - 6.4 Multirate Discrete-Time Systems
    - 6.5 Hybrid Systems
    - 6.6 Summary References
  7. Subsystems and Masking
    - 7.1 Introduction
    - 7.2 Simulink Subsystems
    - 7.3 Masked Blocks
    - 7.4 Conditionally Executed Subsystems
    - 7.5 Logical Subsystems
    - 7.6 Iterative Subsystems
    - 7.7 Summary References
  8. Simulink Analysis Tools
    - 8.1 Introduction
    - 8.2 Determining Model Characteristics
    - 8.3 Executing Models from MATLAB
    - 8.4 Setting Simulation Parameters with `simset`
    - 8.5 Linearization Tools
    - 8.6 Trim Tools
    - 8.7 Optimization Toolbox and Simulink
    - 8.8 Other Toolboxes Useful with Simulink
    - 8.9 Summary References
  9. Callbacks
    - 9.1 Introduction
    - 9.2 Callback Function Overview
    - 9.3 Model Construction Commands
    - 9.4 Graphical User Interfaces with Callbacks
    - 9.5 Callback-Based Animations
    - 9.6 Summary References
  10. S-Functions
    - 10.1 Introduction
    - 10.2 S-Function Block
    - 10.3 S-Function Overview
    - 10.4 M-file S-Functions
    - 10.5 C Language S-Functions
    - 10.6 Summary References
  11. Graphical Animations
    - 11.1 Introduction
    - 11.2 S-Function Animations
    - 11.3 Animation Toolbox
    - 11.4 Dials & Gauges Blockset
    - 11.5 Virtual Reality Toolbox
    - 11.6 Summary References
  12. Debugging
    - 12.1 Introduction
    - 12.2 Finding Model-Building Errors
    - 12.3 Finding Implementation Problems
    - 12.4 Simulink Debugger
    - 12.5 Summary
  13. Numerical Issues
    - 13.1 Introduction
    - 13.2 Choosing a Solver
    - 13.3 Algebraic Loops
    - 13.4 Multiple Sample Time Issues
    - 13.5 Zero-Crossing Detection
    - 13.6 Summary References
  14. Introduction to Stateflow
    - 14.1 Introduction
    - 14.2 Finite State Machines
    - 14.3 State Transition Diagrams
    - 14.4 Stateflow Charts
    - 14.5 Stateflow Quick Start
    - 14.6 Drawing Stateflow Charts
    - 14.7 Labeling States and Transitions
    - 14.8 Stateflow Explorer
    - 14.9 Interfacing with Simulink
    - 14.10 Chart Update Options
    - 14.11 Flowcharts
    - 14.12 Graphical Functions
    - 14.13 Printing Stateflow Charts
    - 14.14 Stateflow Debugger
    - 14.15 Summary References
  15. Introduction to Real-Time Workshop
    - 15.1 Introduction
    - 15.2 Generic Real-Time Target
    - 15.3 Rapid Simulation Target
    - 15.4 xPC Target
    - 15.5 Summary References
- Appendix A Block Reference
- A.1 Continuous Block Library
  - A.2 Discontinuities Block Library
  - A.3 Discrete Block Library
  - A.4 Lookup Tables Block Library
  - A.5 Math Operations Block Library
  - A.6 Ports & Subsystems Block Library
  - A.7 Signal Attributes Block Library
  - A.8 Signal Routing Block Library
  - A.9 Sinks Block Library
  - A.10 Sources Block Library
  - A.11 User-Defined Functions Block Library
- Appendix B Parameter Reference
- B.1 Model Parameters
  - B.2 Common Block Parameters
  - B.3 Mask Parameters
  - B.4 Identifying Block Parameters
